Offset parabolic antennas

Reflector heating

ESO 95 271983

- Suitable for operation in combination with CAS 09/90/90R parabolic antennas
- Prevents ice and snow on the reflector surface
- Special plastics shells with integrated heat insulation ensure proper heat dissipation
- Integrated temperature switch as overheat protection
- Appropriate control unit: ESO 96

ESO 95, CAS 90, ESO 96, ZAS 15

Type		ESO 95
Order no.		271983
Suitable for parabolic antennas		CAS 09/90/90R
Appropriate control unit		ESO 96
Number of heating segments	pc.	1
Mains voltage per segment	V	230 + 6 %/-10 %
Network frequency	Hz	50/60
Nominal current	A	1.5
Power consumption total	W	345
Weight per segment, approx.	kg	1.5
Protection class		IP 65
Temperature protection		60° C opener
Packing unit/weight	pc./kg	1/6.5
